(54) Title: DISPLAY DEVICE WITH CHARGE SHARING

(57) Abstract: The invention relates to a display device and to a method of controlling a display device. A display device with a plurality of pixels arranged in rows *n* and columns *m* is presented so as to render possible an energy saving through charge sharing in the display device, in particular an active matrix display, in which the pixels can be activated via control lines (6), and with a row driver circuit (4) for driving the *n* rows with a row voltage (*V_{row}*), wherein the rows of the display device can be consecutively selected from 1 to *n*, and with a column driver circuit (3) for driving the *m* columns with a column voltage (*V_{col}*) corresponding to the picture data of the pixels (8) of the selected line to be displayed, and wherein it is provided for a transition from a selected row *n* to another row *n+1* that the row voltage (*V_{row}*) is connected to an intermediate voltage level (*V_z*), and the row *n+1* is first connected to the intermediate voltage level (*V_z*) and subsequently is charged up to the required row voltage (*V_{row}*).

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 G09G3/36

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC 7 G09G

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the International search (name of data base and, where practical, search terms used)

EPO-Internal, PAJ, WPI Data

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

* Special categories of cited documents:

A document defining the general state of the art which is not considered to be of particular relevance

E earlier document but published on or after the international filing date

L document which may throw doubts on priority claim(s) or which may establish the publication date of another citation, or other special reason (as specified)

O document referring to an oral disclosure, use, exhibition or other means

P document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
